

RFP2-roller table

Description

Code: *RFP2*

2 m long roller table with idle rollers 550mm wide, max load 1000Kg/m. (h min 935 mm / h max 1015 mm)

RM-Motorized roller

Description

Code: *RM-Rullo motorizzato*

The RM motorized roller is generally placed near the band saw on the loading side; in this way the roller support surface is placed under the piece to be moved. Switching on the feeding selector, the roller automatically raises a few millimeters lifting the bar to be cut. Once the maximum quota is reached, the roller begins to turn moving the piece towards the selected direction: the selector turned anticlockwise makes the bar move backward, while turned clockwise makes it move forward. Releasing the selector, the roller automatically stops and goes down: so for its use the presence of an operator is always necessary. The roller rotation speed can be adjusted before or even during its moving (for instance going fast at the beginning and then slower during blade approach). Our motorized roller can be joined to all models of FMB band saws so that any movement is avoided during the cut. Its moving is electrical and its lifting power is 1,500 kg.
